

Cleaner's Supply RT-100 Rope Ties

RT-100 Rope Ties come in 5 colors that you can use to indicate starch preference, store, service, rush orders, plant sequencing or combinations of any of those.

1. Store the RT-100 Rope Ties as shown.

-
2. When you have accumulated 7 shirts on the Rope Tie Assembly Rack (Item# RA-26), reach around and grasp one Rope Tie, as shown.

-
3. Bring the Rope Tie up and over the bundle of 7 shirts. Lower it to the appropriate place on the bundle, which is over the middle of the breast pocket area.

-
4. Now press the spring-loaded button and pull on the loose end of the cord. Tighten until you are unable to fit your fingers under the cord.

6. Now, repeat the last 3 steps to add another RT-100 Rope Tie at a lower location; a couple of inches above the cuffs. You must use 2 Rope Ties to attain the desired results.

7. As before, press the spring-loaded button and pull on the loose end of the cord. Tighten until you are unable to fit your fingers under the cord.

8. To remove the Rope Ties at the shirt press, grasp and press the spring-loaded buttons and pull on the button slide to loosen.

9. Remove the second Rope Tie.

10. The shirts are "shaken out" and ready to press!
